Subject: US Patent Application 09/544,400 - Our Ref. J532-002 US - RISK ASSESSMENT AND MANAGEMENT SYSTEM

Dear Examiner Havan

Attached and in the following is the text of page 25 of the specification.
 This was the last page of the specification. Page 26 was the first page of the claims.

25

detailed action plans or other lengthy text reports first to determine which items are a priority.

A second type of report that can be generated after at least one report has been prepared is a comparison of new unacceptable items and new acceptable items to show correction from prior reports and to identify both new and long term problems. The report can be generated using a "document compare" software program function to compare a prior report to the current report.

While a specific embodiment of the invention has been shown and described in detail to illustrate the application of the principles of the invention, it will be understood that the invention may be embodied otherwise without departing from such principles.

Regards, Pete
